- Sales of eccentric screw pumps and their replacement parts
- Product-tailored new pump equipment
- Custom production of rubber moulded parts (e.g. pump cladding as wear protection)

Our products: First class, high quality and Made in Germany

With our products in original equipment quality, we offer you a comprehensive and professional range at unbeatably low prices. The article numbers are identical.

It is also possible to cater for individual wishes, such as special engravings or paint finishes.

We produce stators in the following elastomers:

- NBR, EPDM, SBLBM, CB, SM, HNBR, silicon, FKM

and in the following solid materials:

- PTFE virginal, PTFE+25% glass fibre, PA, PE, POM, grey cast iron

We supply rotors in the following materials:

- Stainless steel 1.4571, tool steel 1.2436
- on request, we also offer rotors in other materials or with chrome plating

Furthermore, we also offer a comprehensive range of:

Coupling rods, drive shafts, mechanical seals, bushes and bolts, joint sleeves, collars and all other spare parts in a range of designs and materials.

**Benefit from our many years of expertise!
Talk to us, we are happy to help.**
